-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Prosecution on the merits of this application is reopened on claims 1-23 considered unpatentable for the reasons indicated below:

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 7-8, 10-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Emhardt et al (6,318,217). The device of Emhardt would inherently crack nuts. Note that the slotted portion of member 1 is considered to be a kinking member.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cunningham (5,206,997) in view of Emhardt et al. (6,318,217). Cunningham shows a nutcracker that is similar to the instant device. The connecting link and pin is not the same as claimed but such an arrangement is shown by Emhardt. The Emhardt device offers the advantage of locking the members at a set spacing. Obviously one of ordinary skill in the art would use such a pin and slot arrangement with the Cunningham device. Both engagement members of Cunningham have slots with rear walls that limit rotational movement of the members. The gripping portions of the members have

ridges but are not concave. Concave gripping portions are old and well known in the art and would be obvious to an artisan to use with Cunningham to improve the grip.

Further regarding claim 12 adding grips to the handle portions of the members 10 and 12 of Cunningham would have been obvious to an artisan to improve the operability thereof.

The earlier allowance of the case is regretted.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Douglas D. Watts whose telephone number is (703) 308-0153. The examiner can normally be reached on Mon.-Thurs..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Allen Shoap can be reached on (703) 308-1082. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
